

.NET MVC Developer

What are we looking for?

As one of our team of Software Developers, you will be responsible for providing our clients across multiple industry sectors with an exceptional digital experience. Your role will be to develop, deliver and support our software and web applications, working closely with our engineers, account managers, and other key stakeholders to devise innovative solutions.

Your success will be measured through:

- Your passion for developing great technology
- Your ability to meet deadlines and agreed-time frames
- Your commitment to the quality of your code and design
- Your ability to deliver outcomes which reflect our clients' requirements
- Your commitment to the Asta values

To thrive in this role you will need to have:

Unmatched attention to detail – you're a natural when it comes to noticing the little things others may miss.

A desire to be a true team player – you love sharing your knowledge with others and are not afraid to ask for help when you need it.

An adaptable nature – you don't get stressed when priorities change and can juggle your workload when the targets are moving!

An understanding of the importance of staying ahead of the game and anticipating complications before they become problems.

Great communications skills and the confidence to represent Asta to our clients in a professional manner bringing the benefit of your experience to the conversation appropriately.

Experience working in an agile team (Scrum or Kanban)

We want you to be successful in this role. If you have experience in developing software and web applications in the programming languages and frameworks below, you will be well on your way!

- JavaScript
- MVC + WebAPI
- SQL Server/TSQL
- Angular
- Angular JS
- .NET
- ASP.NET
- C#

It would be great if you also had experience in: (but we can teach you if you don't)

- Java
- Swift
- PHP
- React
- Mobile app development

Who Are We?
